

*We would like to stress a few special, requested devices you can find within our offer:*

## **1. UNLIMITED RANGE WIRETAPPER – modified cell phone (extremely small dimensions)**

Photo1:

Photo 2:

**Wiretapper – cell phone**

### **USE:**

- It is highly recommended for you to buy a new SIM card for this phone (any... 063, 064), so that you can be the only one to know the phone number. By calling that number from any destination, the phone automatically answers and you can hear the conversation that is being conducted in the premises where you put it. It is very important to emphasize that the microphone on this phone is modified so that it is 3 to 4 times sensible than regular, as well as that there is a filter lessening known radio buzzing (disturbances) while the cell phone is working. If you are calling from a cell phone, you can add that number as a Favorite (for consultations: 064/789 or contact us) and a subscription will cost you just 160 RSD monthly, and every connection just 1,5 RSD.

**PRICE: 149 EURO**

*P.S. If you do not have a regular access to the premises where you want to place this device, this is the unique opportunity to order a device with correction; we will all pack within lengthened cable so the battery can be full all the time, and the cell phone active. That finishing would cost additional 20 euros. If you want the same in car, you will get a corrected car adapter that you can hide and camouflage easily; the cell phone will always have a feed while it is in the car, and whenever you call, you will be able to hear the words of a person in the car. The price of the adapter with corrections is additional 59 euros.*

## **2. WIRELESS MICRO-RECEIVER FOR ENTRANCE EXAMS**

**(THE SMALLEST IN THE WORLD!! FROM ISRAEL – dimensions: 4\*6 mm)**

- **Completely imperceptible, the color of skin**
- **It can be placed directly into the auditory canal and that is why this is so unique!**
- **It can not be heard or seen from outside**
- **It is used for SpecOp, security, in TV studios (broadcasting), sports, for entrance exams...**

- **It is compatible with all types of devices (cell phone, mp3, toki-voki, wireless phone)...**

**Wireless Micro-Receiver is tested; the most reliable means that will help you in accomplishing your goals. A number of satisfied services and individuals represent quality and functionality warranty of Wireless Micro-Receiver. 7 years of experience in the service of your success! The set provides you with:**

- **Wireless Micro-Receiver – Zinc Air 1.4V button cell batteries (there are reserve batteries also)**
- **Transmitter with antenna and connector**
- **A box for Wireless Micro-Receiver**
- **User manual translated into your language**

**THE SET PRICE: 129 EURO**

### **A set with wireless receiver and transmitter with antenna and collar (two-way radio cable)**

Photo: Micro-receiver – in front of the box, in the hand, next to the match

- **Micro-receiver (3\*4 mm) connected with Litz wire (0,4 mm) – it is used mainly for exams**

**PRICE: 39 EURO**

### **3. MICRO-WIRETAPPERS**

**Dimensions:** 1\*1,5 cm – for premises, 1\*1 cm – for telephone

**Feed:** For premises – 12 V battery 2,5\*1 cm), 9 V, for telephone – from the phone line

**Features:** Extraordinary sensitiveness of the microphone (covering even 50m<sup>2</sup>!), as well as very good range (from minimal 250 m to 1 km, depending on terrain configuration, and you can expand the range for additional 200 – 400 m by pasting a piece of wire 30 – 50 cm to the receiver with the tape) because of the applied **SMD technology** that is more complex than regular, and is not being applied in our country (**SMD parts are used for cell phones** and are soldered exclusively with magnifying glass because of the miniature dimensions, 1-2 mm), stability – without “moving” of frequency during listening.

#### **Receivers – 3 categories:**

**First:** Any radio with 108,8 MHz

**Second:** Little transistor with extra part that enhances the range of frequency (145 MHz), so that it can work with frequency separate from radio waves + headphones, and

**Third:** Semidigital walkman with radio that can record conversations.

**The price of micro-wiretappers (for premises or phone):**

**49 EURO**

**The price of receivers, regular with headphones** that are working on separate frequency 145 MHz (out of radio waves range – so that you are the only one to hear conversations being conducted in desired premises where you put the micro-wiretapper):

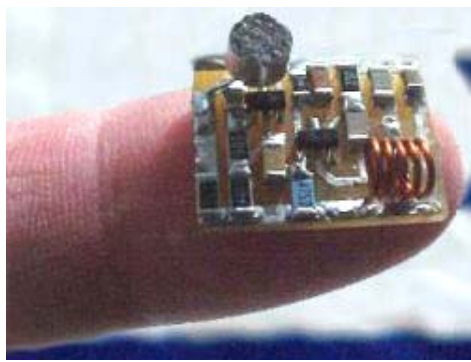

**32 EURO**

**The price of receiver** at the same frequency – 145 MHz that has an additional option to **record conversation** (on the standard audio-cassette): **39 EURO**

The price of digital receiver that can record up to 30 hours on microchip memory (wma digital format) - **69 EURO**

**Photo: Microwiretapper, battery 12V, 9V**

*At this picture you can see a size comparison with standard matchbox (on the left side – battery 12V, on the right – wiretapper).*

#### **4. WALKMAN FOR AUTOMATIC RECORDING AND PHONE CONVERSATIONS CONTROL (It can record up to 3 hours of active conversation and is activated by voice):**

It is activated by picking up the phone, is completely noiseless, without voltage drops in the telephone line, crackling... extraordinary recording quality... **PRICE: 79 EURO**

We would also like to stress the digital recorder for phone conversations with the size of an lighter (records up to 120 hours of active conversation) **PRICE: 129 EURO**

#### **5. MICRO-CAMERAS**

Photo 1

Photo 2

Photo 3

Photo 4

Photo 5

## 16. WRISTWATCH TOKI-VOKI (2 IN SET)

Range up to 2 km, charging battery, headphones and adapter in the set. Very good for entrance exams when there are cell phones disruptors, as well as for other purposes.

*Photo 1. Toki-voki watch; Photo 2. Adapter; Photo 3. Headphones; Photo 4. Charging batteries*

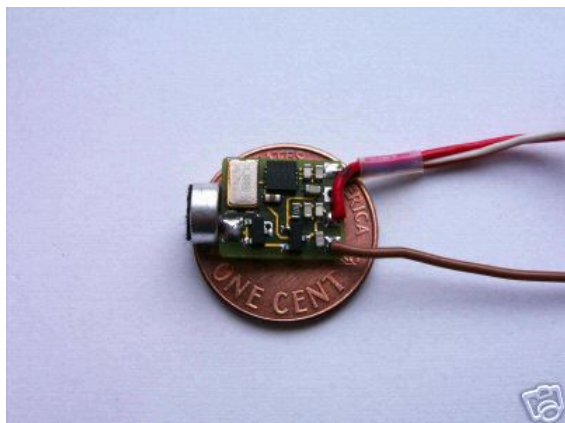

**PRICE: 99 EURO**

## 17. THE NEWEST!

*(a) THE SMALLEST MICRO-WIRETAPPER FOR PREMISES, PHONES, CARS (1,5 and 3V), range up to 200 m through the obstacle.*

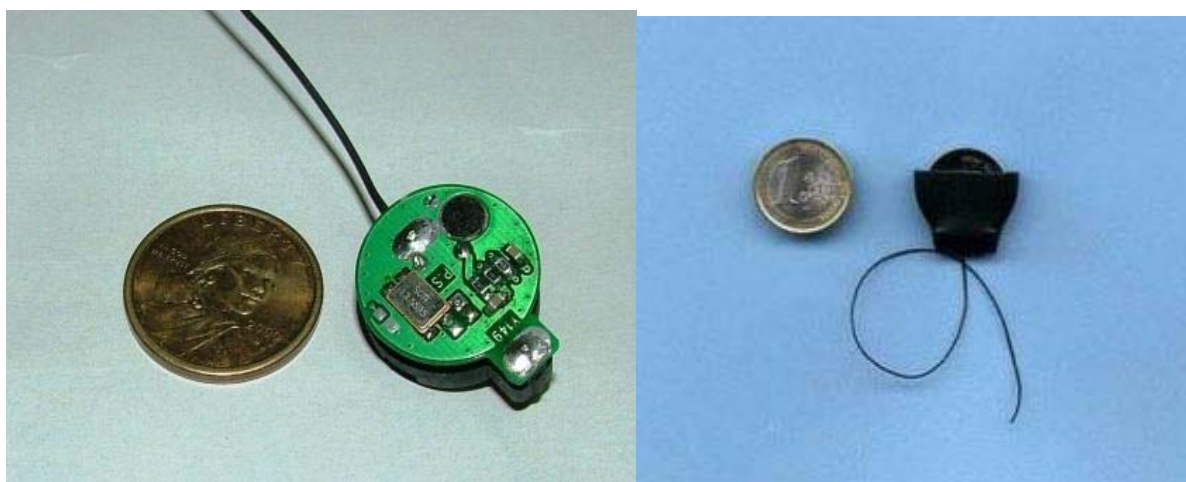

**Dimensions: 9\*7 mm, feed 1,5 V (the battery for the watch is a little more wider)**

**PRICE: 175 EURO**

*(b) Wiretapper with feed on 3 V, and range of up to 500 m through the obstacle.*

## **SURVEILLANCE MICROPHONE**

Highly miniaturized UHF transmitter with integrated lithium battery. Exceptional audio performance. Amplification control. Microphone cable length on request. A distance of more than 200 m can be reached in open field thanks to the power output. The performance obviously depends upon the environmental conditions and the sensitivity of the receiver utilized. To obtain maximum performance, it is advisable to utilise our receivers.

### **TECHNICAL DATA:**

- **Power:** from 3 Volts
- **Emission frequency:** UHF from 500 to 580 MHz

- **Modulation type:** WFM
- **Battery lifetime:** about 4 - 5 days
- **Optional:** micro switch

**PRICE: 139 EURO**

### **18. MINIATURE AUDIO AND VIDEO RECORDER, ACTIVATION BY MOTION, COMPUTER CONFIGURATION SOFTWARE, BATTERY AUTONOMY 12 HRS**

#### **AVR**

#### **MICRO DIGITAL AUDIO AND VIDEO RECORDER**

The device for audio and video material recording, reacts on motion – 3 kinds of recorders.

#### **Technical Characteristics:**

- Video inputs/Audio inputs: 1 / 1
- Alarm inputs: 1
- Compact Flash card capacity: 256MB- 5GB
- Average recording time: 5 hrs. on 2 GB CF card
- Power supply: Built-in Li-Pol battery
- Battery life: recording - 12 hrs.; stand-by - 1 year
- Dimensions: 65x54x15 mm.
- Weight: 75 gr.

**PRICE: from 280 EURO** (depending on recording capacity)

### **19. (addition) ALARMS (FOUR KINDS) – FOR GAS, SMOKE, WATER AND AGAINST SLEEPING DURING DRIVING**

**PRICE: (alarm for gas, smoke, water) – 35 EURO
